“From this program, I have gradually learned to be more open with ideas and beliefs that conflict with my own. I would say that I have learned how to understand before evaluating an issue. Not only that, but being a part of an extremely diverse community served me well.”

“One of the programs they include in Bryan is a colloquium class. Many of the speakers that presented gave us insight on some of the programs available, how they chose their career path and how we could get involved on campus. It was very informative and motivating listening to all the different speakers.”
